EXPERIENCE

Software Developer, Mobile/Web Applications – CloudMD · MyHealthAccess
Cloud Practice Inc.   February 2019 - Present, Victoria, BC

· Led a project reworking an existing Ruby-On-Rails patient-booking web application into an Android/iOS app with video chat functionality. Released it on the App Store and Google Play
· Refactored the existing RoR application into an API server--following RESTful conventions, and created an entirely new frontend using Vue.js and Typescript
· Mentored and code reviewed other developers brought onto the project to explain the full-stack structure and teach best practices while following agile methodologies for productive and iterative development
· Integrated the Ionic/Capacitor mobile framework for cost-efficiency, and ease of cross-platform development experience while maintaining a native look and feel
· Optimized database queries and Java business logic on the Spring/Hibernate backend of the *JunoEMR* system, communicating to *CloudMD/MyHealthAccess* through external SOAP endpoints
· Built the *CloudMD* kiosk software currently being used by various pharmacies, including *Save-On-Foods*
· Built an internal Appointment Queue System (AQS) Spring microservice shared between *MyHealthAccess* and *JunoEMR*

Junior Software Developer
Cloud Practice Inc.   March 2017 - October 2017, Victoria, BC

· Implemented feature requests, bug fixes and unit tests for a Java-based EMR web application
· Extensive refactors and optimization of legacy code on a Spring framework backend.
· Wrote new and maintained existing scripts to handle database imports for healthcare providers
· Handled any application or server issues reported through PagerDuty when assigned to a week-long 24-hour support
